

*I'm a **web developer, information architect, and web designer***

Capabilities

Front-End Development - Has been knee-deep in the world of HTML and CSS for over 9 years, with increasingly deep forays into JavaScript development using JQuery and Node.js.

Information Design - Designs websites, applications, and documents with function first and foremost. Organization and user experience are emphasized with color, typography and other design decisions.

Photoshop Heroics - Has used Photoshop daily for over 9 years. Lightning-fast reflexes and a deep knowledge of the best tricks and techniques result in speedy, effective designs and mock-ups.

Graphic Design - Familiar with the dark arts of graphic design; from the print world of DPI, CMYK, and registration marks to the cool, digital world of pixels, resolution, and hex values.

Work History
